

Dynamic Dashboards ensure that information is delivered directly to the individuals that need it, when they need it and in clear, intuitive and visually engaging formats that make it easy to interpret and rapidly act upon.

Raw data is synthesized to create up-to-the-minute graphs and charts, presented in ways that best suit your specific business processes and metrics and which supports quick action by decision makers when a KPI moves out of a pre-defined range.

Dynamic Dashboards make finding the right information easy and intuitive. One click drill-down retrieves and displays the underlying charts and detailed data for in-depth analysis.

Dashboard Reporting

Funds-Axis Dynamic Dashboards are available as an integral component of the **Funds-Axis GRC™** application. Equally, they can be integrated with virtually all your business systems to provide consistent dashboard reporting, and all with a single sign-on.

Funds-Axis Dynamic Dashboards are compatible with virtually any database, including Microsoft SQL Server, Oracle, Paradox, Microsoft Access, Microsoft Excel, XML (and any OLEDB or ODBC compliance data source).
